

DRAIN AWAY DRAIN TRAY

Don't Wreck Your Deck

Ditch the standing water and let gravity do the draining work.

A single solution for standing water.

With the Drain Away Drain Tray, you can now have beautiful potted plants on your deck, around your pool, or in front of your business without the mess of staining your area with the plant's water runoff. Our drain tray is designed with a sloped gutter and a threaded spout, so you are in control of where your water goes!

Where do you use it?

The better question is, where wouldn't you use it? The Drain Away Drain Tray is perfect for the garden, indoor grow rooms, patio decks, and more. Customize your setup by connecting multiple Drain Away Drain Trays together for 100% water drainage.

What makes Drain Away Drain Tray so great?

You can water another plant or simply avoid a stain on the patio using a Drain Away Drain Tray! The Drain Away Drain Tray is made of sturdy ABS plastic and comes in 3 sizes with 4 different colors to accommodate a variety of garden projects. Made in the USA!

Stay Connected

Now you can easily connect several trays together and drain to one area.

Sized To Perfection

Works with standard 25gal. nursery pots and smaller ones. 12", 15.5" & 22" models.

Water In, Water Out

Don't worry about overfilling pots and creating puddles. Problem solved.

FAQ

Will a garden hose screw onto the drain trays?

The spout on the Drain Away drain trays is standard $\frac{3}{4}$ " threading designed to work with PVC and irrigation-type fittings. A garden hose is not threaded the same and will not give you a leak-free seal.

Do I need to attach a pump to the drain line to make them drain?

The Drain Away drain trays are designed with a sloped gutter creating a flow because of gravity. We have customers running large operations, on level floors, with no pumps for evacuation.

Can I leave the drain trays outside year-round?

Yes! Our drain trays have UV inhibitors and are made to be used year-round.
