

## **Super Nutrients - Product Info**

Super Nutrient formulas are water-soluble plant foods for indoor or outdoor use. Super Nutrients has been giving outstanding results to a large community of growers for the past 20+ years. Super Nutrient formulas are two-part solutions designed for both Bloom and Vegetative growth. Super Nutrients are easy to use, yield powerful results time after time, and are ideal for all growing applications.

Here's the best part. By designing the formulas as two-part solutions, you actually get twice the amount of liquid nutrients for your dollar compared to nationally known products on the market today.

Extensive testing of Super Nutrients across North America has determined their effectiveness in soft and hard water applications. Soil and soilless tests were conducted in a variety of hydroponic applications by leading retail stores in California, Florida, New York, Tennessee, and throughout Canada. The results have been nothing less than superb.

### **Super Nutrients Bloom Formula For Outstanding Flowering**

The Super Nutrients Bloom formula was designed as a two-part nutrient to ensure **maximum flowering potential**. All primary nutrients are included in the formula to promote healthy, lush flowering growth. Super Nutrients Bloom formula is pH balanced with little to no pH up/down required. Some applications may vary.

### **Super Nutrients Veg Formula for Rapid Growth**

The Super Nutrients Veg formula was designed as a two-part nutrient to ensure **maximum growth potential**. All primary nutrients are included in the formula to promote healthy, lush, vegetative growth. Super Nutrients Veg formula is pH balanced with little to no pH up/down required. Some applications may vary.

### **Benefits of Using Super Nutrients**

- Super Nutrients are user-friendly and simple to use.
- The A and B solutions are mixed evenly to ensure proper nutrient levels.
- The solutions are highly concentrated, which means more value for your dollar.
- Super Nutrients won't clog up filters, drip lines, or leave sediment build up like most other formulas.
- Super Nutrients is available in multiple sizes, including Quart, Gallon, 2.5 Gallon, and 5 Gallon sizes. The Veg Formula also comes in 55-gallon barrels.
- Super Nutrients will dramatically increase yields regardless of plant type or growing method.
